Ideation Phase
Brainstorm & Idea Prioritization Template

Date	04 October 2026
Team ID	SWTID-2026-5690
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

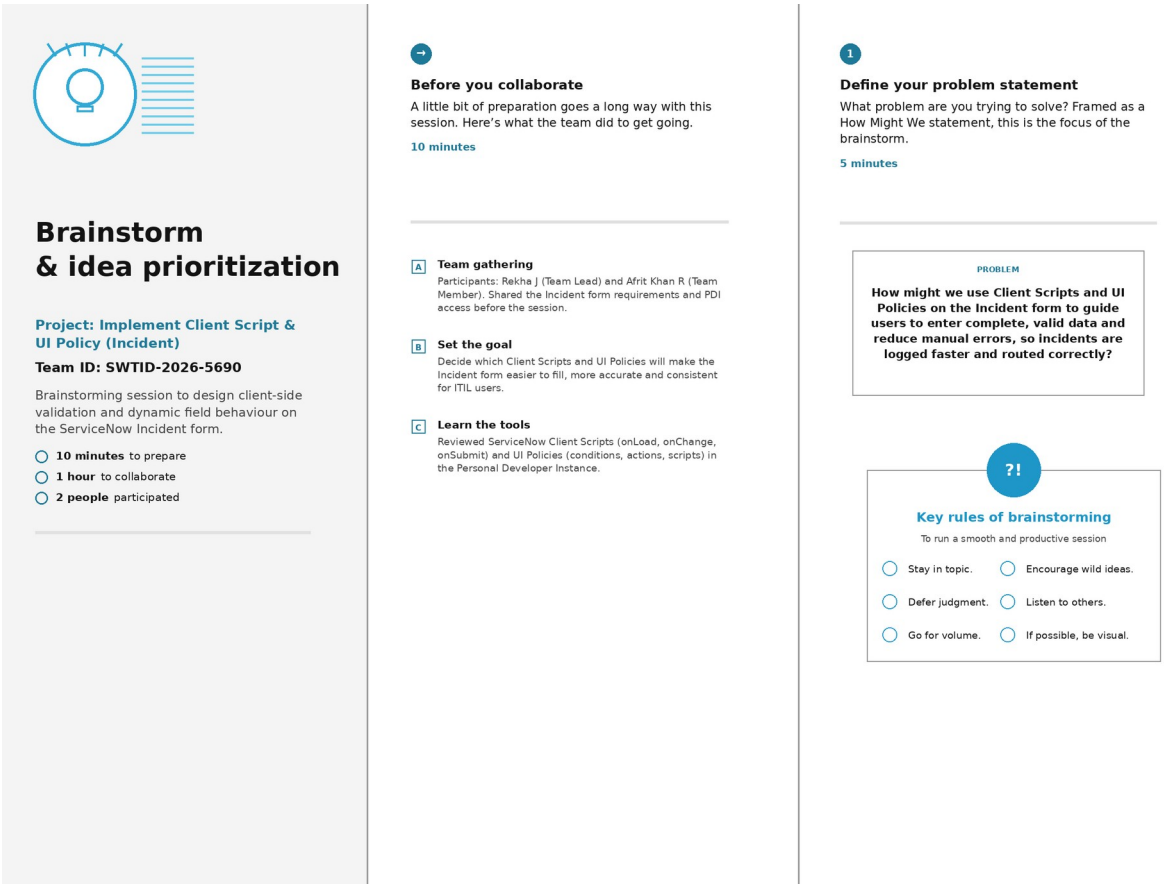

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address the problem statement.

10 minutes

TIP

Each idea is a Client Script or UI Policy behaviour for the Incident form.

Rekha J (Team Lead)

- Make Short description mandatory (UI Policy)
- Show Resolution fields when State = Resolved
- Make Close notes mandatory when Resolved / Closed
- Set Caller read-only after the record is saved
- onLoad message guiding users to fill details
- Test form as ITIL user and end user

Afrit Khan R (Team Member)

- onChange: clear Subcategory when Category changes
- onSubmit: Description must be 20+ characters
- Alert when Impact and Urgency are both High
- Field hint message under Short description
- Confirm before submitting a P1 incident
- Capture changes in an Update Set

Total ideas generated: 12

Ideas cover form field behaviour, data validation, user guidance, and testing/deployment of the configuration.

3

Group ideas

Similar ideas were clustered together and each cluster was given a sentence-like label.

20 minutes

Use UI Policies to control field behaviour

- Short description mandatory
- Show Resolution fields on Resolved
- Close notes mandatory on Resolved / Closed
- Caller read-only after save

Guide users while they fill the form

- onLoad guidance message
- Field hint under Short description

Use Client Scripts to validate entered data

- Clear Subcategory on Category change
- Description minimum 20 characters
- Alert for High Impact + High Urgency
- Confirm before submitting P1

Test and move the configuration safely

- Test as ITIL and end user
- Capture changes in Update Set

Step-3: Idea Prioritization

4

Prioritize

The team agreed on what is important moving forward. Ideas were placed on the grid to decide which are important and which are feasible.

20 minutes

Prioritized ideas

Priority 1 - Implement first

1. Close notes mandatory on Resolved / Closed (UI Policy)
2. Short description mandatory (UI Policy)
3. Show Resolution fields when State = Resolved (UI Policy)
4. Clear Subcategory on Category change (onChange)
5. Description minimum 20 characters (onSubmit)

Priority 2 - Implement next

6. Alert for High Impact + High Urgency (onChange)
7. Caller read-only after save (UI Policy)
8. Field hint under Short description
9. onLoad guidance message
10. Test as ITIL and end user

Priority 3 - If time permits

11. Confirm before submitting P1 (onSubmit)
12. Capture changes in Update Set

TIP

Priority 1 ideas have the highest importance and feasibility and form the first build: they directly improve data quality at resolution and logging time.
